

GRIZZLY™

EQUIPMENT

332 000 HYDRAULIC WORKHORSE

This machine is equipped with a hydraulic cylinder and quick couplings, allowing the use of a larger dump tray with greater capacity since the operator does not need to raise the tray manually. The operator controls forward and reverse using only one progressive control lever allowing smooth departures and stops with precision. The brake is locked and un-locked automatically. The dump control lever is also smooth and precise.

All options are sold separately.

GX270 Honda engine
Forward and reverse ability
Automatic locking brake

Available options:
