

# PROTECTO-ZINC™

**· PROTECT THE BEAUTY OF YOUR ROOF ·**

**with PROTECTO-ZINC™**

A roof can look degraded, dirty and even damaged due to moss, fungus and algae build up and this generally happens on the north side or shaded side of the roof.

Protect your investment by installing the PROTECTO-ZINC strips. When it rains, rain water flowing over the zinc strips will produce zinc oxide, which inhibits the growth of moss, fungus and algae.

**PRESERVE THE BEAUTY OF YOUR ROOF WITH PROTECTO-ZINC !**

## 99% PURE ZINC

The PROTECTO-ZINC strips are manufactured of 99% pure zinc, are 36 inches (91,4 cm) in length, and can be easily installed with the use of basic tools (We recommend that you use the services of a roofing contractor.)

**DON'T LET YOUR ROOF REACH THIS STATE !**
