

INSTRUCTION FOR INSTALLATION & USE OF GRIZZLY # 825 000 ROOF BRACKET

WARNING:

Never install Roof brackets more than 4' apart. Never allow more than one person between 2 Roof brackets. Roof brackets should only be used by persons experienced in the construction trade and having full knowledge of their use and installation. A personal fall arrest system must be worn at all times by anyone using Roof brackets. Improper use of product could result in serious injury.

ATTACHING ROOF BRACKETS:

Attach Roof brackets to roof using 3" spiral nails, all nail positions must be used. Position Roof brackets so nails will penetrate roof rafters. Place them no more than 4' apart.

SETTING PLATFORM:

Platform plank should be at least 2" nominal thickness and extend beyond Roof brackets a minimum of 6" but not more than 12". Platform must be fully decked and made of a single, clear, straight grained wood Plank. Secure platform by nailing through platform retainer of Roof bracket into edge of plank. Do not overlap platform planks. If extended platform is required, use additional Roof brackets.

CARE & MAINTENANCE:

Inspect all Roof brackets before and after each use to be sure no damage or deterioration has taken place. If Roof bracket is rusted or deteriorated, discard at once. Do not throw or drop roof brackets.
