## 850 000 GUARD RAIL SYSTEM

**GRIZZLY** proposes an effective guard rail system. It is compact and economic, made of two parts, the post and the clamp.

All you need to do is to tighten the clamp on the parapet wall and fix it mechanically, then insert the post. Join the posts using 2 X 4 X 8' lumber.

If the use of clamps is not possible, the posts could be used without the clamps by screwing them directly to the parapet wall or use the guard rail wall mount bracket (sold separately).

<b>WEIGHT:</b>	850 000	13.5 LBS
	850 100	6.5 LBS
	850 200	7 LBS
	850 400

## 850 000 GUARD RAIL SYSTEM

### GUARD RAIL SYSTEM INSTALLATION INSTRUCTIONS

Tighten the clamp (850 100) tightly against the parapet wall, make sure that the clamp is vertical. Fix it to the parapet wall using 1-1/2" #10 wood screws. Install all other clamps the same way at 6 feet intervals..

Insert a guard rail post (850 200) into the clamp (850 100) and fix it to the top of the parapet wall using 2-1/2" #10 wood screws. Repeat for every guard rail post.

Insert 2 X 4 studs through the bottom opening, lay them flat and make sure they extend one foot (12 inches) on either side of the guard rail post. Once the studs are in the correct position, screw them together using 2-1/2" #10 wood screws.

Insert 2 X 4 studs through the top opening in the vertical position and make sure that they extend 1 foot (12 inches) on either side of the guard rail post. Once the studs are in the correct position, screw them together using 2-1/2" #10 wood screws.

If you need more information, please do not hesitate to communicate with us.
