

GRIZZLY™

EQUIPMENT

222 000 BOTTLE WARMER

This bottle warmer has been developed to facilitate work during cold winter days.

It allows the use of propane gas more efficiently by maintaining water and glycol at a warm temperature (ideally 30°) controlled by the operator, so tanks won't freeze up.

The lateral burner is equipped with a thermocouple that turns off the gas if the flame is blown out.

The bottle warmer features a lift ring that allows lifting the bottle warmer with two propane tanks on board. A plug is fitted on the side for ease of emptying when not in use.

The **GRIZZLY** bottle warmer is supplied with all necessary accessories as shown (except propane tanks of course).

Chains
Burner and accessories
Chimney heat shield

WEIGHT: 210 LBS
