

GRIZZLY™

EQUIPMENT

501 000 TT600 HOIST

The **GRIZZLY** TT600 hoist has a 600 lbs lifting capacity. Its front and rear legs are adjustable in height and its front leg has two gates. The rear leg base is designed to receive **GRIZZLY** #597 000 counterweights (sold separately). The standard power unit features a 6.5 HP Honda engine and a bearing mounted drum with pawl and spring, and a 100' x 3/16" aircraft cable. The engine is fixed to the chassis and a clutch mechanism, with idler, pulls the load up. The hoist is supplied with block, pins and hook. For even more load control we suggest the optional **GRIZZLY** #503 500 hydraulic power unit featuring a 9 HP Honda engine and smooth starts and stops, better precision and powered descents.

#503 500
Hydraulic power unit
available
